Jensen Huang

Founder, President and CEO

Jensen Huang founded NVIDIA in 1993 and has served since its inception as president, chief executive officer and a
member of the board of directors.

Starting out in PC graphics, NVIDIA helped build the gaming market into the largest entertainment industry in the world
today. The company’s invention of the GPU in 1999 made possible real-time programmable shading, which defines modern
computer graphics, and later revolutionized parallel computing. More recently, GPU deep learning ignited modern AI — the
next era of computing — with the GPU acting as the brain of computers, robots and self-driving cars that can perceive and
understand the world.

Huang is a recipient of the Semiconductor Industry Association’s highest honor, the Robert N. Noyce Award; IEEE Founder’s
Medal; the Dr. Morris Chang Exemplary Leadership Award; and honorary doctorate degrees from Taiwan’s National Chiao
Tung University, National Taiwan University, and Oregon State University. He has been named the world’s best CEO by
Harvard Business Review and Brand Finance, as well as Fortune’s Businessperson of the Year and one of TIME
magazine’s 100 most influential people.

Prior to founding NVIDIA, Huang worked at LSI Logic and Advanced Micro Devices. He holds a BSEE degree from Oregon
State University and an MSEE degree from Stanford University.
