NVIDIA CEO to Present Keynote Address at GPU Technology Conference

SANTA CLARA, CA -- NVIDIA today announced that Jen-Hsun Huang, NVIDIA CEO and co-founder, will deliver a keynote address at the GPU Technology Conference (GTC), on May 15 beginning at 10:30am PT.

Huang will review the dramatic and growing impact of GPU technology in science, industry, design and many other fields.

A live video webcast of the address will be available at http://www.gputechconf.com/page/home.html#.

Visit the GTC 2012 homepage for more information about the conference.

About NVIDIA
NVIDIA (NASDAQ: NVDA) awakened the world to computer graphics when it invented the GPU in 1999. Today, its processors power a broad range of products from smartphones to supercomputers. NVIDIA's mobile processors are used in cell phones, tablets and auto infotainment systems. PC gamers rely on GPUs to enjoy spectacularly immersive worlds. Professionals use them to create 3D graphics and visual effects in movies and to design everything from golf clubs to jumbo jets. And researchers utilize GPUs to advance the frontiers of science with high performance computing. The company has more than 4,500 patents issued, allowed or filed. For more information, see www.nvidia.com.

Certain statements in this press release including, but not limited to statements as to: the impact of GPU technology in science, industry, design and many other fields are forward-looking statements that are subject to risks and uncertainties that could cause results to be materially different than expectations. Important factors that could cause actual results to differ materially include: global economic conditions; our reliance on third parties to manufacture, assemble, package and test our products; the impact of technological development and competition; development of new products and technologies or enhancements to our existing product and technologies; market acceptance of our products or our partners products; design, manufacturing or software defects; changes in consumer preferences or demands; changes in industry standards and interfaces; unexpected loss of performance of our products or technologies when integrated into systems; as well as other factors detailed from time to time in the reports NVIDIA files with the Securities and Exchange Commission, or SEC, including its Form 10-K for the fiscal year ended January 29, 2012. Copies of reports filed with the SEC are posted on the company's website and are available from NVIDIA without charge. These forward-looking statements are not guarantees of future performance and speak only as of the date hereof, and, except as required by law, NVIDIA disclaims any obligation to update these forward-looking statements to reflect future events or circumstances.
